Specification for transport label for

Bring

- Revised services sent from Norway

- Courier Services

- Home Delivery services like furniture and more special handling

Version 1.2 –
(New edition)

Contents

Version history:

Version number	Date	Description
1.0	2018.10.26	New and improved edition. Only for revised services in this document and Appendix2 – Posten and Bring.
	2019.04.30	Some small changes.
	2019.05.09	Field S. COD identifier is moved down for better space for recipient information. Se example.
1.1	September 2021	Added 5400 Business Pallet. Updated code 9000, 9100 and 9300 (**Code (field AD))**
1.2	Juni 2022	Added services for Home delivery and Bring Express – Courier Services. MARK! Home Delivery and Courier does not use NPB in the TDT segment. Nothing changes there when comes to EDI setup.
1.2	March 2023	Added service 9350 – Retur til bedrift

1 Introduction

From 2019 Posten and Bring will implement some revised services for existing and new customers. This document describes the first set of services that will be launched for customers. Moving existing customers from their current solutions to the revised services is to happen according a plan on a customer level agreed upon between Bring, the customer and the integration partners where relevant. Please contact us on integrasjon.norge@bring.com for questions or information regarding label specifications. The current services are still in use and the documentation is being updated on developer.bring.com/edi

In 2019 and 2020 Bring will offer services that are to use UPU labels and S10 barcodes. This is because of Brings partners in the Nordic countries and rest of the world. Posten Norge AS also cooperates with other Post companies in the UPU, Universal Postal Union.

This specification is a description of the labels for marking goods and parcels for transportation by simultaneous use of EDI. To which countries you can send packets with EDI, we refer to the applicable specifications for EDI file formats and Appendix2 and 2A.

The label is designed according to the CEN EN 1573 Multi-industry Transport Label. For more information follow the link below:

https://www.norstella.no/

From June 2022 we also move label spesification for Courier and Home Delivery (furniture and more special handling) to this specification. So that we in some time can only have one. The EDI is not changing and can't be used as revised services. Very important. So like 2870 services will still use TDT = BEX and TSR = HUB.

2 Content

The specification contains descriptions regarding:

All revised service in Appendix2_Posten_Bring_XX

And for Home Delivery and Courier in APPENDIX_1-9-21_V2_CourierExpress_HomeDelivery and CargoSE-DK

3 Dimension

The most useful standard dimension for the label is 101x192mm. This specification is based on this dimension.
It is also possible to use other dimensions, for example, a width of 148mm.
But the minimum height is 192mm.

4 Material

The label should have a material that is durable, and the package's underlying structure does not affect the readability of barcodes. More about barcodes in next chapter 5 "Quality".

5 Quality

In addition to good quality of the barcode, it's important how the label is placed on the consignment. To maintain a good delivery quality, the barcode must be located so that the entire barcode is displayed, without wrinkles or folds.
Do not place tape above the barcode.
The print quality should be without tears or blurred lines.

To achieve good quality, the printers must be cleaned at least once a week.

6 Barcodes

6.1 Description of GS-1 128

The barcode should, depending on the content, be of symbology GS1-128 according to GS1 / UCC standard, Code 128 according to EN 799, X-module a minimum of 0,375 mm, height at least 22 mm. Readability should be tested and be satisfactory after CEN EN1635 standard, quality (overall) minimum ANSI B (according to ANSI X3.182:1990).

For more detail information, see the documentation from GS1 Norge "GS1 General Specification": https://www.gs1.org/docs/barcodes/GS1_General_Specifications.pdf

The CEN license plate requires the use of standard identifiers to describe the use of the barcode. When GS1-128 code is used, it should be an application identifier (00) ahead of the barcode for the License plate-number. This code also contains identifiers for packaging type, country, and shall also contain the customer number in GS1. Including the code identifiers, the License plate-number consists of 20 numeric characters.

6.2 Description of Code 39

This section will be updated when Bring activates revised service for abroad. Posten and Bring will have partners and cooperation with other Post companies around the world.
Regarding Parcels, until further notice, only Code 39 can be used as barcode symbol and UPU's S10 standard for content.
The bar code shall be of symbol code 39 according to EN 800 Quality ANSI B, X module 0375 mm and the ratio 2.33:1 or 2.0:1, height 22 mm. The customer is obliged to order a new number series at the Post Office, at least two weeks prior to the current number series is expected to be exhausted.
Readability should be tested and be satisfactory after CEN EN1635 standard, minimum ANSI B
For more detail documentation:
http://www.barcodeisland.com/code39.phtml

6.3 FACT standard

Only for special use in Posten/Bring. Requires agreement.

FACT standard, which uses Code128, also contains identifiers. For the License Plate it will be 3J when EDI is used. This code can contain up to 35 alpha-numeric characters.

6.4 Use of barcodes in Posten/Bring

GS1-128 is used for all transport domestic.

For transport abroad for the parcel service is it code 39 (S10). This section will be updated when Bring activates revised service for abroad. Posten and Bring will have partners and cooperation with other Post companies around the world.

7 Elements of data

The illustration below shows which fields the label is divided into. In chapter 9 we will refer to the field. The illustration is based on the dimension 101x192mm.

Individual fields	
Field	**Description**
A	Information regarding the consignor
B	Return address/Alternative consignor
C	Information regarding the consignee
D	Date
E	Postcode for delivery address
F	City
G	Postal address
H	Phone number
I	Country
J	License plate number/ Packages ID
K	Number of transport units
L	Weight
M	Volume
N	Consignment number/ Shipment ID
O	Freight payer

Section of alternative information (transport instruction)		
P	*COD amount*	*See examples for placement and description of the fields in the document*
Q	*Bank account number*	
R	*KID number or COD reference*	
T	*Barcode space for future use*	
U	*Recipient by using service code 1036 Pick up*	
V	*Symbols that can be used for VAS*	
W	*Transport instruction*	

Individual fields	
Field	**Description**
Y	Identification of additional services
Z	Transport logo
AA	Service name
AB	Service code
AC	Code regarding the additional service
AD	Priority code
AE	Consignee reference
AF	Consignor reference
S	COD identifier. See example.
AG	Delivery instruction
AH	Lisence plate (barcode)
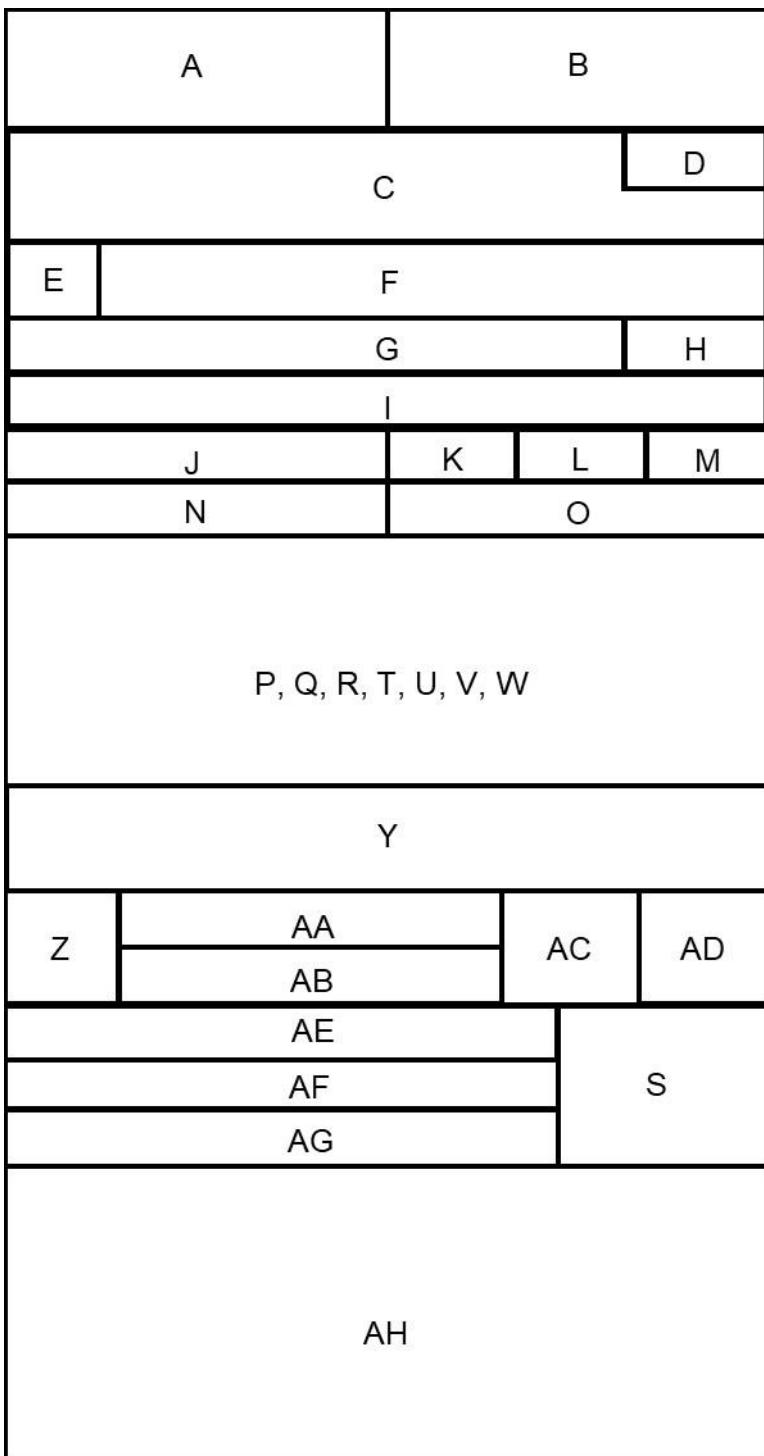

Figure 1: Field description

8 Information blocks

The label consists of 4 major blocks that shall contain as described below:

1. Consignor:
The sender-information is in these fields:
A – B

2. Consignee:
The receiver-information is in these fields:
C – I

3. Information about the transport:
The transport information is in field:
J – AG

4. Barcodes:
The barcode is in field:
AH

9 The contents of the data elements

9.1 Fonts

The font should be Arial, Gill Sans or Sans Gentle, or fonts with another term that gives almost the same look. Is it indicated in fonts in bold, the font will be Arial Narrow bold / Gill Sans Bold / Gentle Sans bold, or another clear sans serif font. General size is set to 10 - 12 points. The prompts are set to 8 point.

In the examples and the font in this specification is in Arial.

9.2 Description of content in the data elements

9.2.1 Field A: Information regarding the consignor

Type	Place	Selectable	Size	Notes
Information regarding the consignor				
Name	Left alignment	Mandatory	10 – 12 point	
Address	Left alignment	Mandatory	10 – 12 point	
Postcode	Left alignment	Mandatory	10 – 12 point	
City	Left alignment	Mandatory	10 – 12 point	
Country	Left alignment	Recommended	10 – 12 point	Abroad it is mandatory.
Prompt: From:			8 point	

9.2.2 Field B: Return address /Alternative consignor

Type	Place	Selectable	Size	Notes
Return address/Alternative consignor	Left alignment			Return address when its deviate from the information in Field A
Prompt: Return to:			8 point	

Content in the field:

Type	Place	Selectable	Size	Notes
Name	Left alignment	Mandatory	10 – 12 point	
Address	Left alignment	May	10 – 12 point	
Postcode	Left alignment	Mandatory	10 – 12 point	
City	Left alignment	Mandatory	10 – 12 point	
Country	Left alignment	May	10 – 12 point	

9.2.3   Field C: Information regarding the consignee

NB! There should be a frame of 1mm width round the fields C - I

Type	Place	Selectable	Size	Notes
Information regarding the consignee	Left alignment			
Name	Left alignment	Mandatory	10 – 12 point	
Attention	Left alignment	May	10 – 12 point	
Address lines	Left alignment	May	10 – 12 point	Number of address lines depending on demand and place
Prompt: To:			8 point	For location and design, see examples

9.2.4   Field D: Date

Type	Place	Selectable	Size	Notes
Date	Left alignment	Mandatory	10 – 12 point	Should be stated as: 13.01.18 or 13.01.2018
Prompt: Date			8 point	For location and design, see examples

9.2.5   Field E: Postcode for delivery address

Type	Place	Selectable	Size	Notes
Postcode for delivery address (with country code)	Left alignment	Mandatory	28 point	Country codes with 2 letter codes. According to the international standard ISO-3166

9.2.6   Field F: City

Type	Place	Selectable	Size	Notes
City	Left alignment	Mandatory	20 point	

9.2.7   Field G: Postal address

Type	Place	Selectable	Size	Notes
Postal address (Post box or street/road) Postcode and city	Left alignment	Mandatory	10-12 point	To be used when different from the delivery address.
Prompt: Postal address:			8 point	For location and design, see examples

9.2.8   Field H: Phone number

Type	Place	Selectable	Size	Notes
Phone number	Left alignment	Mandatory	10-12 point	
Prompt: Phone			8 point	For location and design, see examples

9.2.9 Field I: Country

Type	Place	Selectable	Size	Notes
Country	Left alignment	Mandatory	10-12 point Bold	To be stated in capital letters

9.2.10 Field J: Consignment item number

Type	Place	Selectable	Size	Notes
Consignment item number	Left alignment	Mandatory	10-12 point	Consignment item number (mandatory) be unique for each parcel
Prompt: License Plate No:			8 point	For location and design, see examples

9.2.11 Field K: Number of items

Type	Place	Selectable	Size	Notes
Number of items	Left alignment	Mandatory	18 point, Bold	The total number of items
Prompt: Colli:			8 point	For location and design, see examples

9.2.12 Field L: Weight

Type	Place	Selectable	Size	Notes
Weight	Left alignment	Recommended	18 point, Bold	Is mandatory for 5100, 5200*, 5300 og 9100
Prompt: Weight:			8 point	For location and design, see examples

9.2.13 Field M: Volume

Type	Place	Selectable	Size	Notes
Volume	Left alignment	Conditional	18 point, Bold	To be stated in dm^3
Prompt: Volum:			8 point	For location and design, see examples

9.2.14 Field N: Consignment number

Type	Place	Selectable	Size	Notes
Consignment number	Left alignment	Mandatory	10-12 point	
Prompt: ConsignmentID:			8 point	For location and design, see examples

9.2.15 Field O: Freight payer

Type	Place	Selectable	Size	Notes
Freight payer	Left alignment	Mandatory	10-12 point	To show who is paying the freight (examples): - Consignor - Consignee - Third party
Prompt: Payer:			8 point	For location and design, see examples

9.2.16 Field P: COD amount

Type	Place	Selectable	Size	Notes
COD amount	Left alignment	Conditional	10-12 point	Mandatory-field when CODE 1000 "COD" is chosen. At multi-parcel the amount must be stated on each (every) label. Must also contain currency code according to ISO 4217 three-letter code
Prompt: Amount/currency:			8 point	For location and design, see examples

9.2.17 Field Q: Bank account number

Type	Place	Selectable	Size	Notes
Bank account number	Left alignment	Conditional	10-12 point	Mandatory when CODE 1000 "COD" is chosen. If this is more than one transport unit (colli or package) you have to state the account number on each label.
Prompt: Bank account no:			8 point	For location and design, see examples

9.2.18 Field R: KID/COD reference

Type	Place	Selectable	Size	Notes
KID/COD reference	Left alignment	May	10-12 point	May contain a KID number, or the text : "GIROSENDING COD".
Prompt: KID/COD reference:			8 point	For location and design, see examples

9.2.19 Field T: Recipient

Type	Place	Selectable	Size	Notes
Recipient	Right alignment	Conditional	7 point	Recipient address is required when service code 1036 (Pickup point)
Prompt: Recipient			8 point	For location and design, see examples

9.2.20 Field U: Symbol

Type	Place	Selectable	Size	Notes
Symbol	Right alignment under Recipient	Recommended		See point 11.

9.2.21 Field V: Barcode for future use

Type	Place	Selectable	Size	Notes
Barcode and text	Mid alignment	.	Height: 15	This is for future use
Prompt: License plate no:		Mandatory	8 point	For location and design, see examples

9.2.22 Field W: Transport instruction

Type	Place	Selectable	Size	Notes
Transport instruction	Mid alignment	See value added service time stamp		For future use
Prompt: Transport instruction:			8 point	For location and design, see examples

9.2.23 Field Y: Identification of additional services

Type	Place	Selectable	Size	Notes
Identification of additional services	Left alignment	Conditional	10-12 point	See point 10 table.

9.2.24 Field Z: Transporter logo

Type	Place	Selectable	Size	Notes
Logo (graphical element)	Left alignment	Mandatory		See developer.bring.com

9.2.25 Field AA: Service name

Type	Place	Selectable	Size	Notes
Service name	Left alignment	Mandatory	10-12 point	See point 10: Service table down below for correct name and see Appendix 2
Prompt: Service			8 point	For location and design, see examples

9.2.26 Field AB: Service code

Type	Place	Selectable	Size	Notes
Service code	Left alignment	Mandatory	10-12 point	See point 10: Service table down below for correct code and see Appendix 2
Prompt: ServiceID:			8 point	For location and design, see examples

9.2.27 Field AC: Code regarding the additional service

Type	Place	Selectable	Size	Notes
Additional service	Ahead of the priority code in Field AC	Conditional	26 point	See point 10: Service table for correct additional service

9.2.28 Field AD: Priority code

Type	Place	Selectable	Size	Notes
Priority code	Left alignment	Mandatory	26 point	See point 10: Service table for correct priority code

9.2.29 Field AE: Consignee Reference

Type	Place	Selectable	Size	Notes
Reference field	Left alignment	Conditional	10-12 point	
Prompt: Consignee reference:		Conditional	8 point	For location and design, see examples

9.2.30 Field AF: Consignor reference

Type	Place	Selectable	Size	Notes
Reference field	Left alignment	Conditional	10-12 point	
Prompt: Consignor reference:		Mandatory	8 point	For location and design, see examples

9.2.31 Field S: COD Identifier

Type	Place	Selectable	Size	Notes
COD identifier Graphic element (triangle)	Right alignment	Conditional	Length: 28mm Height: 12mm	Mandatory if CODE 1000 "COD" is chosen. If multi-parcel the symbol must be printed at each label. For location and design, see examples

9.2.32 Field AG: Delivery instruction

Type	Place	Selectable	Size	Notes
Delivery disclaimer	Left alignment	Conditional	10-12 point	
Prompt: Delivery instruction:		Mandatory	8 point	For location and design, see examples

9.2.33 Field AH: Consignment Item (barcode)

Type	Place	Selectable	Size	Notes
Barcode and text	Mid alignment	Mandatory	Height: 35 % of the with, minimum 22mm	The contents of the bar code shall be printed below the code in clear
Prompt: License plate no:		Mandatory	8 point	For location and design, see examples

10

10.1 General overview services and valued added services

This table contains only the value added services that are mandatory for display on the label. For total overview of Service Name/Code and value added services please see Appendix 2.

Service				Priority and performance		
Service name (field AA)	Service code (field AB)	Value added service code (field Y)	Value added service (field Y)	Code (field AC)	Code (field AD)	Notes
Ekspress neste dag/ Express Next Day	4850	1036	Valgfritt hentested/ Choice of pickup point	V	1	Could also be combined with "L" for Saturday delivery: "LV1"
		1062	Utlevering lørdag/ Saturday Delivery	L		Could also be combined with "Valgfritt hentested", then "LV1"
		1083	Termo/ Thermo-transport	T		T" to be used in combination with the additional service code 1083. **Valid only after special agreement between Bring and customer**
